We upgrade business communications

PASCOM[®]

WHY PASCOM?

ALL IN ALL BETTER CONNECTED

Simple Telephony is a thing of the past. Digital Transformation is the future and Unified Communications are the key.

Business Telephony, Video Conferencing, Team Messaging, Screen Sharing, File Sharing ... modern Business Communication is now a multi-channel experience - involving various endpoints from numerous vendors all with different platforms.

Added to this is the ever increasing need to ensure the connectivity of all involved. Today's workplace is global, with work being done anywhere with internet access.

Successful communication in today's business world means expertly mastering both the customer engagement and the intricate interplay of the different channels, endpoints and the user experience.

Packed full of productivity enhancing Unified Communications tools coupled with a host of advanced contact centre functions; pascom telephone systems are more than just a business telephony platform.

pascom's cutting edge cloud communications technology is integrated into every pascom cloud phone system and on-premise IP PBX, ensuring a simple, flexible and enhanced business communications experience - regardless of your preferred deployment option.

With pascom at the heart of your Communications, you will have a centralised, intelligent hub with which you can gain total control over your business communications - no matter how diverse and dynamic your communication channels.

THE INDIVIDUAL TELEPHONE COCKPIT FOR EACH AND EVERY EMPLOYEE.

pascom of course offers all the features of a classic telephone system: making & receiving calls, organising teleconferences and so much more - but now with a clearer, unified & much more comfortable overview. Instantly see which colleagues are reachable and with "Skills Based Routing" who is most ideally suited to take a call. As an individually custom User Interface, Wallboards are adaptable to the exact needs of each employee.

THE HIGH PERFORMANCE CONTACT CENTRE FOR YOUR COMPANY.

pascom is the perfect communications platform for connecting employees at all levels. Smart applications and unparalleled system openness facilitate access to company critical IT processes such as the interconnect between your ERP system or CRM data environments.

THE MULTI-CHANNEL TEAM BUILDER FOR YOUR CONFERENCING NEEDS.

Enter the world of "Unified Communications" and collaboration. In the age of Smartphones and almost ubiquitous access to the internet, flexibility and unlimited connectivity have become key to smooth successful communication.

WHAT ARE YOU WAITING FOR? IT CAN'T GET ANY BETTER.

Except with our regular upgrades and updates.
pascom is your ticket to the newest freedom of communication for your business.
Everyone with everything better connected.

TRANSPARENT PRICING

We are not a fan of hidden costs: with our “Concurrent User” concept, calculating pascom solution costs is straightforward. At pascom, we don't believe in playing tricks with hidden add-ons. What's more, pascom is completely open to each and every Telephony Provider.

THE PERFECT FIT FOR YOUR IT

pascom adapts itself to perfectly fit your IT and is available as a Hardware based, Virtual or Cloud based solution. It goes without saying that no matter which solution your company chooses – with each variant, our complete range of communication tools will of course be available to you.

THE PERFECT FREE STARTER PACK

Consisting of 2 concurrent users, which can be flexibly used by any number of employees. As a further benefit to you, our pascom FREE edition is permanently free including pascom hosting. The full range of functions are available for testing and when needed you can upgrade at anytime and at a fair, customer-friendly price.

MADE IN GERMANY - SINCE 1997

As a privately run company, pascom has stood for quality and reliability for more than 20 years. pascom software development and support services are delivered directly by our in-house teams located in our headquarters in the heart of Bavaria as is our certified Data Centre.
